

McCullum Award

Nominations are invited for the 1977 McCullum Award of the American Society for Clinical Nutrition. Nominations must be submitted in *five copies* and include 1) a letter outlining the basis for the nomination; 2) a list of *published* papers of the nominee that are immediately pertinent to the nomination; 3) reprints of those papers that most effectively support the nomination; and 4) the nominee's curriculum vitae. (A complete bibliography is not needed.)

Seconding or supporting letters that do not add information to, or simply duplicate, the original nomination will not be accepted.

Sponsored by the National Dairy Council and administered by the American Society for Clinical Nutrition, this award consists of a grant of \$1,000 and an inscribed scroll. It is presented at the annual meeting of the Society to the individual who, by his investigations of biological processes, etiology of diseases, and of methods of treatment and control, has made a distinguished contribution to the field of clinical nutrition in the past five years.

Nominations are to be sent to: American Society for Clinical Nutrition, 9650 Rockville Pike, Bethesda, Maryland 20014, to arrive not later than October 31, 1977.

Previous winners of the award are:

- 1965 Robert E. Olson
- 1966 Charles S. Davidson
- 1967 Ancel Keys
- 1968 L. Emmett Holt, Jr.
- 1969 Edward H. Ahrens, Jr.
- 1970 William H. Crosby
- 1971 Donald S. Fredrickson
- 1972 Victor D. Herbert
- 1973 Charles S. Lieber
- 1974 William B. Bean
- 1975 Nevin S. Scrimshaw
- 1976 Ricardo Bressani
- 1977 C. E. Butterworth, Jr.

Gordon Research Conferences August 8-12, 1977

The Gordon Research Conferences for the summer of 1977 will be held in New Hampshire and California.

Program. The complete program for the 1977 Gordon Research Conferences is published in *Science*, March 11, 1977. Reprints are available on request.

Requests for applications to the Conferences, or for additional information should be addressed to: Dr. Alexander M. Cruickshank, Director, Gordon Research Conferences, Colby-Sawyer College, New London, New Hampshire 03257. Tel. 603-526-2870.

Information for Authors

THE AMERICAN JOURNAL OF CLINICAL NUTRITION

Revised January 1976

The Editors of The American Journal of Clinical Nutrition welcome concise articles on new findings in the field of nutrition. Scientific papers of completed original research are preferred and will be given early publication. Invited papers, editorials, and Perspectives in Nutrition and other categories will be utilized as space permits.

Manuscripts and books for review should be sent directly to the Editor, Robert H. Herman, M.D., Department of Medicine, Letterman Army Institute of Research, San Francisco, California 94129. Phone: (415) 561-4147.

As is customary in professional publications, statements in articles are the responsibility of the authors. Articles must be contributed solely to The American Journal of Clinical Nutrition; material is copyrighted and may not be reproduced without permission, which may be obtained by writing to the Journal at 9650 Rockville Pike, Bethesda, Maryland 20014.

Preparation of manuscripts

Authors are requested to follow these instructions carefully in preparing manuscripts: Please double space *all* material, including tables and references, using wide margins; type on one side of the sheet only; make a carbon copy for yourself and send *the original and two carbon or Xerox copies to the Editor*; include full name, schools, degrees, staff position, and affiliation; indicate with an asterisk to whom reprint requests should be sent. Use superscript numerals for footnotes, and type footnotes on a separate page.

List bibliographic references numerically and in serial order as referred to in the article. Place the reference numbers in the text between parentheses, as (5). Please make certain each reference contains name of author with initials; title of article; name of periodical, with volume, page, and year. For example: PAIGE, D. M., T. M. BAYLESS AND G. G. GRAHAM. Pregnancy and lactose intolerance. *Am. J. Clin. Nutr.* 26: 238, 1973. For titles of journals, follow the abbreviations given in the Chemical Abstracts "List of Periodicals," 1961 and supplements. In references to book titles, the following should appear in sequence: name of author(s), title, place of publication, publisher's name, year of publication, and page number. Example: SIEGEL, S. *Non-parametric Statistics for the Behavioral Sciences*. New York: McGraw-Hill, 1956, p. 83. Authors must be responsible for the accuracy and completeness of their references as these will not be rechecked by the Editors.

Unpublished work should not be included in the list of references unless the paper has been accepted for publication. It may be recognized by such parenthetical credits as "(unpublished observations)" or "(personal communication)" in the text.

Abstract. An abstract should accompany each manuscript of a communication. For a brief communication, include a 100-word abstract, for an original communication a 200-word abstract. The abstract should be an abbreviated, accurate representation of the article. It should be written in a single paragraph, double-spaced, using complete, connected sentences, active verbs, and the third person.

Preparation of illustrations

So that your article will be presented most effectively, illustrations must be glossy prints or professional drawings in black ink (never in blue; it will not produce well). All printing on illustrations should be done professionally and be large enough to be legible if reduction is necessary. Reference to all illustrations should be inserted in the text in consecutive order. Please follow these identification instructions: With a soft pencil write the figure number and the author's name on the back of each illustration and indicate the top. Do not use paper clips on glossy prints. Type legends for illustrations double-spaced on a separate sheet with numbers corresponding to those on the photographs or drawings. Please do not attach legends to the pictures.

Charges to authors

Excess illustrative material. Authors are encouraged to limit illustrations and tables to the necessary minimum for lucid and precise presentation. The cost of material in excess of 1½ Journal pages for figures, tables, and legends will be charged to the author. *Special arrangements must be made in advance with the publishers for any reproduction in color.*

Reprints. Orders for reprints should be sent on the form the author receives with galley proof. The American Journal of Clinical Nutrition does not request payment of page charges from authors. The cost of the first 100 reprints will cover a portion of the publication costs of the article.

Every author should make sure he has funds available for all charges on his article. Since these charges will be computed by the publisher from bills submitted by the printer, it might be several months after publication before an author receives his bill.

Correcting proof

Two sets of galley proofs and one set of engravers proofs together with the original

manuscript are sent to the author. Galleys should be carefully checked and any necessary changes or printer's errors (to be marked in red) should be clearly indicated in the margins. Except for correction of typographic errors, the cost of author alterations of subject matter in type will be charged to authors if these charges exceed the Journal's allowance of \$10. Authors should consider this when financial arrangements are made with their institutions for payment. Proof should be returned to the Redactory, The Williams & Wilkins Company, 428 East Preston St., Baltimore, Maryland 21202.

Auxiliary publication

Additional detailed tables, appendixes, mathematical derivations, extra figures, and other supplementary matter too costly to be included in the Journal article may be submitted for deposition without charge with the National Auxiliary Publications Service of the American Society for Information Science. Material is deposited by the Editor with the consent of the author, and a footnote is carried in the published article to the effect that photostat or microfilm copies are available at moderate cost.

For additional technical requirements of the Journal, including acceptable form for abbreviations, authors are referred to the *Council of Biology Editors Style Manual*, 3rd edition (1972), published for the Council of Biology Editors by the American Institute of Biological Sciences, 1401 Wilson Blvd., Arlington, VA 22209 (\$6.00 a copy). For nomenclature, cf. *J. Nutr.* 104: 138, 1974.

Symposium On Recent Advances In Pediatric Nutrition

Symposium co-sponsored by the Department of Nutrition and Food Science of the Massachusetts Institute of Technology, Cambridge, Massachusetts, the Children's Hospital Medical Center of Boston, and the Institute for Pediatric Service of the Johnson & Johnson Baby Products Company, at the Sheraton-Boston Hotel, Boston, September 15-18, 1977. Chairman: Robert M. Suskind, M.D. This program, in which over 30 nationally and internationally known experts in the field of pediatric nutrition will participate, will include discussions of infant nutrition, primary nutrient deficiency states, and the role of nutrition as it interacts with primary disease states. Some of the subjects to be covered: nutritional support of the surgically ill neonate; treatment of childhood and adolescent obesity; nutritional considerations in the pathogenesis and treatment of children with Crohn's disease and ulcerative colitis; nutritional considerations in the etiology and treatment of cancer in children. **For further information, write: Steven Sawchuk, M.D., 220 Centennial Avenue, Piscataway, N.J. 08854.**

AMERICAN INSTITUTE OF NUTRITION ANNOUNCES

A PRICE REDUCTION FOR

CUMULATIVE INDEX

for

JOURNAL OF NUTRITION

(Volumes 70 - 99 1960 - 1969 270 pages)

POSTPAID PRICE \$12.00 (formerly \$18.00)

This decennial index has separate author and subject sections, and covers articles published for the years 1960 through 1969. It is printed in large type for easy readability.

CRC FORUM ON OBESITY

Chaired by: JOHN R. K. ROBSON, M.D., D.P.H., Professor of Nutrition, Medical University of South Carolina.

Participants: HENRY A. JORDAN, M.D., Behavioral Weight Control Program, University of Pennsylvania, GEORGE V. MANN, ScD., M.D., Professor of Nutrition, School of Medicine, Vanderbilt University, and DEREK MILLER, Ph.D., Senior Lecturer, Department of Nutrition, Queen Elizabeth College, University of London (England).

Not prepared lectures with scripts, but live discussion, analysis, and exchange of ideas among four of the world's experts on obesity. Recorded March 18, 1977, just days after the FDA's proposal to ban saccharin, this Forum offers the latest developments to all involved with the treatment and care of the obese patient.

OUTLINE

SIDE 1. Introduction and participants statements
(30 mins.) Prevalence of obesity.

SIDE 2. Genetics
(30 mins.) Thermogenesis, gene, cellular.

SIDE 3. Environment
(30 mins.) Early feeding, glandular, cultural, and social effects.

SIDE 4. Implications
(30 mins.) Diabetes, cardio-vascular disease, hypertension, wear and tear, psychology, minor irritations, menarche growth.

SIDE 5. Treatment
(30 mins.) Diet, weight control, total fast, protein modified fast, quality, slimming groups, bizarre treatments.

SIDE 6. Treatment (cont.)
(30 mins.) Drugs — amphetamines, T3, saccharin, bulking agents, thermogenic drugs.
Activity — exercise and energy dissipation.
Surgery — procedures. Prognosis for treatment.

SIDE 7. Behavior modification
(30 mins.) Life modification, material and personnel needs.
Prognosis for treatment.

SIDE 8. Management
(30 mins.) Who to treat.
Criteria for obesity — weight, height, skinfold.
Standard for obesity — relative weight, Quetelets Index, emotional indices.
Preventive measures.
New and established treatment regimes — individualized and holistic approach, diet quality, activity and energy dissipation, drugs, role of paramedical personnel.
Future developments — thermogenic drugs.
Warnings — hazards of surgery, starvation, bizarre diets, dangers during pregnancy and growth.
Summary.

Now Available. Includes four one-hour audio tapes (C-60 Cassettes), and a bound copy of the research papers. Sold only in complete sets.
