EDITORIALS

Are alkylresorcinols accurate biomarkers for whole grain intake? *RM van Dam and FB Hu*
See corresponding article on page 832. **797**

Egg consumption in relation to cardiovascular disease and mortality: the story gets more complex. *RH Eckel*
See corresponding article on page 964. **799**

REVIEW ARTICLE

Consequences of smoking for body weight, body fat distribution, and insulin resistance. *A Chioloro et al* **801**

ORIGINAL RESEARCH COMMUNICATIONS

Obesity and eating disorders

Dietary energy density and diet variety as predictors of outcome in anorexia nervosa. *JE Schebendach et al* **810**

Lipids

Parallel activation of de novo lipogenesis and stearoyl-CoA desaturase activity after 3 d of high-carbohydrate feeding. *MF-F Chong et al* **817**

Reduced oxidation of dietary fat after a short term high-carbohydrate diet. *R Roberts et al* **824**

Nutritional status, dietary intake, and body composition

Alkylresorcinols as biomarkers of whole-grain wheat and rye intake: plasma concentration and intake estimated from dietary records. *R Landberg et al*
See corresponding editorial on page 797. **832**

Predictors of iron status in well-nourished 4-y-old children. *I Öhlund et al* **839**

Energy-dense, low-fiber, high-fat dietary pattern is associated with increased fatness in childhood. *L Johnson et al* **846**

Carbohydrate metabolism and diabetes

Comparison of the effects on insulin resistance and glucose tolerance of 6-mo high-monounsaturated-fat, low-fat, and control diets. *A Due et al* **855**

Vitamins, minerals, and phytochemicals

Further characterization of a furanocoumarin-free grapefruit juice on drug disposition: studies with cyclosporine. *MF Paine et al* **863**

A double-blind, placebo-controlled, randomized trial of the effects of dark chocolate and cocoa on variables associated with neuropsychological functioning and cardiovascular health: clinical findings from a sample of healthy, cognitively intact older adults. *WD Crews Jr et al* **872**

Iron absorption in young Indian women: the interaction of iron status with the influence of tea and ascorbic acid. *P Thankachan et al* **881**

Pregnancy and lactation

Maternal n-3, n-6, and trans fatty acid profile early in pregnancy and term birth weight: a prospective cohort study. *M van Eijsden et al* **887**

Choline concentrations in human maternal and cord blood and intelligence at 5 y of age. *C Signore et al* **896**

Growth, development, and pediatrics

Genetic and shared environmental influences on children's 24-h food and beverage intake: sex differences at age 7 y. *MS Faith et al* **903**

Effect of long-chain polyunsaturated fatty acid supplementation of preterm infants on disease risk and neurodevelopment: a systematic review of randomized controlled trials. *LG Smithers et al* **912**

Effects of α -lactalbumin-enriched formula containing different concentrations of glycomacropeptide on infant nutrition. *O Sandström et al* **921**

Home fortification of complementary foods with micronutrient supplements is well accepted and has positive effects on infant iron status in Ghana. *S Adu-Afarwah et al* **929**

Digestive and liver diseases

Comparison of cytokine modulation by natural peroxisome proliferator-activated receptor γ ligands with synthetic ligands in intestinal-like Caco-2 cells and human dendritic cells—potential for dietary modulation of peroxisome proliferator-activated receptor γ in intestinal inflammation. *R Marion-Letellier et al* **939**

Effect of n-3 polyunsaturated fatty acids on Barrett's epithelium in the human lower esophagus. *SP Mehta et al* **949**

Continued on Table of Contents Inside

SUPPLEMENT

Assessment of Vitamin D in Population-Based Studies **1073S**
