CLINICAL NUTRITION

VOLUME 24 NUMBER 7 JULY 1971

CONTENTS

symposium

Biochemistry and pathology of tryptophan metabolism and its regulation by amino acids, vitamin B₆ and steroid hormones. Guest editor *R. R. Brown*

part II

- 751 Effects of tryptophan metabolites on enzymes of oxidative phosphorylation. *E. Quagliariello and F. Palmieri*
- 764 The role of tryptophan metabolites in regulating gluconeogenesis. *H. A. Lardy*
- 766 Studies on the mechanism of tryptophan induction of certain hepatic enzymes. *R. Kido, M. Nishino and H. Tsuda*
- 770 Functional nature of the polysomes as indicated by the influences of insulin-glucose and adrenalectomy-cortisol on rat liver polysomes in vivo. *J. S. Wittman, III and O. N. Miller*
- 777 Factors affecting ribosomal aggregation in the isolated perfused rat liver. *P. B. Swan, E. McGown, A. Richardson and L. M. Henderson*
- 779 Effect of tryptophan on polyribosomes and protein synthesis in liver. *H. Sidransky, E. Verney and D. S. R. Sarma*
- 786 Effects of steroid conjugates on availability of pyridoxal phosphate for kynureninase aminotransferase activity. *M. Mason and B. Manning*
- 792 Hormonal alteration of efficiency of conversion of tryptophan to urinary metabolites of niacin in man. *H. Wolf*
- 800 Regulation of nicotinamide metabolism. *L. S. Dietrich*
- 805 Localization and some properties of kynurenine-3-hydroxylase and kynurenine aminotransferase. *O. Hayaishi and H. Okamoto*
- 807 Studies of tryptophan metabolism in experimental animals and man during infectious illness. *M. I. Rapoport and W. R. Beisel*
- 815 Effects of amino acid derivatives and drugs on the metabolism of tryptophan. *T. L. Sourkes*
- 821 Central nervous system hypersensitivity to tryptophan. *D. B. Coursin*
- 826 A possible diabetogenic role for tryptophan metabolites and effects of xanthurenic acid on insulin. *Y. Kotake and E. Murakami*
- 830 Effects of adrenal hormones and stress on brain serotonin. *G. Curzon*

(continued on inside cover)

(continued from back cover)

- 835 Anergy and tryptophan metabolism in Hodgkin's disease. *V. T. DeVita, B. A. Chabner, D. M. Livingston and V. T. Oliverio*
- 841 The role of urinary tryptophan metabolites in the etiology of bladder cancer. *G. T. Bryan*
- 848 A possible role of urinary metabolites of tryptophan in the heterotopic recurrence of bladder cancer in man. *O. Yoshida, R. R. Brown and G. T. Bryan*

Part I of this symposium appeared in the June issue of this Journal.

letters to the editor

- 853 Assessing the nutritional status of the mentally retarded. *S. M. Garn and H. F. Weir*

brief communication

- 855 Serum cholesterol and triglycerides during mild glucose intolerance. *T. S. Danowski, R. C. Khurana, Y. Jung, J. P. Wingert, J. H. Aarons, C. Katz and D. G. Corredor*
- 859 Neutropenia in prolonged fasting. *E. J. Drenick and L. C. Alvarez*

original communications

- 864 Ethnic differences in skin-fold thickness. *J. R. K. Robson, M. Bazin and R. Soderstrom*

comments in biochemistry

- 869 Water and sodium retention in the fasted and refed human. *D. M. Gozansky and R. H. Herman*

comments in gastroenterology

- 872 Can small daily doses of antibiotics prevent the cycle of diarrhea, malabsorption, and malnutrition in children? *N. Hirschhorn* —

methods in nutrition

- 876 Plasma amino acids: screening, quantitation, and interpretation. *C. R. Scriver, C. L. Clow and P. Lamm*

PHS publications

- 891 Height and weight of children in the United States, India, and the United Arab Republic.
