

The American Journal of  
**CLINICAL NUTRITION**

VOLUME 83 NUMBER 2 FEBRUARY 2006

### Editorials

- 187 The innate immune system: friend and foe. *CB Stephensen and DS Kelley*  
**See corresponding article on page 331.**
- 189 Fast food and sedentary lifestyle: a combination that leads to obesity. *DR Jacobs Jr*  
**See corresponding article on page 362.**

### Review Article

- 191 The acute and chronic toxic effects of vitamin A. *KL Penniston and SA Tanumihardjo*

### Original Research Communications

#### Obesity and eating disorders

- 202 Associations of body fat and its changes over time with quality of life and prospective mortality in hemodialysis patients. *K Kalantar-Zadeh, N Kuwae, DY Wu, RS Shantouf, D Fouque, SD Anker, G Block, and JD Kopple*
- 211 Effect of a high-protein breakfast on the postprandial ghrelin response. *WAM Blom, A Lluch, A Stafleu, S Vinoy, JJ Holst, G Schaafsma, and HFJ Hendriks*

#### Lipids

- 221 Effects of dietary saturated, monounsaturated, and n-3 fatty acids on blood pressure in healthy subjects. *BM Rasmussen, B Vessby, M Uusitupa, L Berglund, E Pedersen, G Riccardi, AA Rivellese, L Tapsell, and K Hermansen for The KANWU Study Group*
- 227 Effect of a low-fat diet on fatty acid composition in red cells, plasma phospholipids, and cholesterol esters: investigation of a biomarker of total fat intake. *IB King, RN Lemaitre, and M Kestin*

#### Cardiovascular disease risk

- 237 Effects of butter high in ruminant *trans* and monounsaturated fatty acids on lipoproteins, incorporation of fatty acids into lipid classes, plasma C-reactive protein, oxidative stress, hemostatic variables, and insulin in healthy young men. *T Tholstrup, M Raff, S Basu, P Nonboe, K Sejrnsen, and EM Straarup*
- 244 Effect of soy protein varying in isoflavone content on serum lipids in healthy young men. *BL McVeigh, BL Dillingham, JW Lampe, and AM Duncan*

#### Nutritional status, dietary intake, and body composition

- 252 Optimized predictions of absolute and relative amounts of body fat from weight, height, other anthropometric predictors, and age. *I Larsson, B Henning, AK Lindroos, I Näslund, CD Sjöström, and L Sjöström*
- 260 Effects of variation in protein and carbohydrate intake on body mass and composition during energy restriction: a meta-regression. *JW Krieger, HS Sitren, MJ Daniels, and B Langkamp-Henken*

#### Carbohydrate metabolism and diabetes

- 275 Whole grains, bran, and germ in relation to homocysteine and markers of glycemic control, lipids, and inflammation. *MK Jensen, P Koh-Banerjee, M Franz, L Sampson, M Grønbaek, and EB Rimm*  
**See corresponding CME exam on page 392.**
- 284 Potato and french fry consumption and risk of type 2 diabetes in women. *TL Halton, WC Willett, S Liu, JE Manson, MJ Stampfer, and FB Hu*

#### Energy and protein metabolism

- 291 Methionine kinetics are altered in the elderly both in the basal state and after vaccination. *S Mercier, D Breuillé, C Buffière, J Gimonet, I Papet, P Patureau Mirand, and C Obled*

#### Vitamins, minerals, and phytochemicals

- 299 Human vitamin E requirements assessed with the use of apples fortified with deuterium-labeled  $\alpha$ -tocopheryl acetate. *RS Bruno, SW Leonard, S Park, Y Zhao, and MG Traber*

(continued)

- 305 Absorption of iron from recombinant human lactoferrin in young US women. *B Lönnerdal and A Bryant*
- 310 Absorption of calcium from milks enriched with fructo-oligosaccharides, caseinophosphopeptides, tricalcium phosphate, and milk solids. *E López-Huertas, B Teucher, JJ Boza, A Martínez-Férez, G Majsak-Newman, L Baró, JJ Carrero, M González-Santiago, J Fonollá, and S Fairweather-Tait*

### **Pregnancy and lactation**

- 317 Bone calcium turnover during pregnancy and lactation in women with low calcium diets is associated with calcium intake and circulating insulin-like growth factor 1 concentrations. *KO O'Brien, CM Donangelo, CL Vargas Zapata, SA Abrams, EM Spencer, and JC King*

### **Growth, development, and pediatrics**

- 324 Upward weight percentile crossing in infancy and early childhood independently predicts fat mass in young adults: the Stockholm Weight Development Study (SWEDES). *U Ekelund, K Ong, Y Linné, M Neovius, S Brage, DB Dunger, NJ Wareham, and S Rössner*

### **Immunity**

- 331 Dose-related effects of eicosapentaenoic acid on innate immune function in healthy humans: a comparison of young and older men. *D Rees, EA Miles, T Banerjee, SJ Wells, CE Roynette, KWJ Wahle, and PC Calder*  
**See corresponding editorial on page 187.**

### **Cancer**

- 343 Fiber, sex, and colorectal adenoma: results of a pooled analysis. *ET Jacobs, E Lanza, DS Alberts, C-H Hsu, R Jiang, A Schatzkin, PA Thompson, and ME Martínez*
- 350 Nutritional status of outpatients with systemic immunoglobulin light-chain amyloidosis. *R Caccialanza, G Palladini, C Klersy, H Cena, C Vaglia, B Cameletti, P Russo, F Lavatelli, and G Merlini*

### **Aging**

- 355 Green tea consumption and cognitive function: a cross-sectional study from the Tsurugaya Project. *S Kuriyama, A Hozawa, K Ohmori, T Shimazu, T Matsui, S Ebihara, S Awata, R Nagatomi, H Arai, and I Tsuji*

### **Nutritional epidemiology and public health**

- 362 Predictors of weight gain in a Mediterranean cohort: the Seguimiento Universidad de Navarra Study. *M Bes-Rastrollo, A Sánchez-Villegas, E Gómez-Gracia, JA Martínez, RM Pajares, and MA Martínez-González*  
**See corresponding editorial on page 189.**  
**See corresponding CME exam on page 394.**
- 371 Schistosomiasis japonica, anemia, and iron status in children, adolescents, and young adults in Leyte, Philippines. *T Leenstra, LP Acosta, GC Langdon, DL Manalo, L Su, RM Olveda, ST McGarvey, JD Kurtis, and JF Friedman*
- 380 Vitamin K status of healthy Japanese women: age-related vitamin K requirement for  $\gamma$ -carboxylation of osteocalcin. *N Tsugawa, M Shiraki, Y Suhara, M Kamao, K Tanaka, and T Okano*

### **Letters to the Editor**

- 387 High-protein diet, obesity, and the environment. *F Contaldo and F Pasanisi*
- 387 Reply to F Contaldo and F Pasanisi. *A Astrup*
- 388 Reply to F Contaldo and F Pasanisi. *HS Callahan, CC Matthys, JQ Purnell, and DS Weigle*
- 389 Assessment of biomarker selection in selenium-deficiency disease. *XL Wang*
- 389 Reply to XL Wang. *Y Xia, J Xu, DW Byrne, KE Hill, and RF Burk*
- 390 Do unsaturated fatty acids function as endogenous antibacterial and antiviral molecules? *UN Das*

(continued)

## Continuing Medical Education

- 392 Jensen MK, et al. Whole grains, bran, and germ in relation to homocysteine and markers of glycemic control, lipids, and inflammation.
- 394 Bes-Rastrollo M, et al. Predictors of weight gain in a Mediterranean cohort: the Seguimiento Universidad de Navarra Study.
- 396 AJCN CME Participant Response Form

## Supplement: Living Well to 100: Nutrition, Genetics, Inflammation

- 403S Preface. *JM Ordovas*
- 404S What is healthy aging in the 21st century? *RGJ Westendorp*
- 410S Evidence for nutritional benefits in prolonging wellness. *ET Kennedy*
- 415S Starting down the right path: nutrition connections with chronic diseases of later life. *J Dwyer*
- 421S Nutritional mechanisms that influence cardiovascular disease. *R De Caterina, A Zampolli, S Del Turco, R Madonna, and M Massaro*
- 427S Nutritional modulators of bone remodeling during aging. *GR Mundy*
- 431S Evidence for genetic variation as a factor in maintaining health. *GW Duff*
- 436S Influence of human genetic variation on nutritional requirements. *PJ Stover*
- 443S Genetic interactions with diet influence the risk of cardiovascular disease. *JM Ordovas*
- 447S Interleukin 1 and interleukin 18 as mediators of inflammation and the aging process. *CA Dinarello*
- 456S Inflammation and cardiovascular disease mechanisms. *P Libby*
- 461S Obesity and the role of adipose tissue in inflammation and metabolism. *AS Greenberg and MS Obin*
- 466S Genetics of aging: implications for drug discovery and development. *BJ Geesaman*
- 470S Inflammation and neurodegenerative diseases. *WST Griffin*
- 475S Interleukin 1 genetics, inflammatory mechanisms, and nutrigenetic opportunities to modulate diseases of aging. *KS Kornman*
- 484S The different paths to 100. *TT Perls*
- 488S The future of living well to 100. *GW Duff, P Libby, JM Ordovas, and PR Reilly*

## Supplement: Looking Ahead in Honoring the Past

- 495S Preface. *NK Fukagawa and NS Scrimshaw*
- 496S Vernon R Young: the man, the scientist, the visionary. *NS Scrimshaw, T Kitamura, AM Ajami, and NK Fukagawa*
- 500S New functions for amino acids: effects on gene transcription and translation. *SR Kimball and LS Jefferson*
- 508S Arginine: beyond protein. *SM Morris Jr*
- 513S Network analysis of plasma and tissue amino acids and the generation of an amino index for potential diagnostic use. *Y Noguchi, Q-W Zhang, T Sugimoto, Y Furuhata, R Sakai, M Mori, M Takahashi, and T Kimura*
- 520S What do -omics mean for the science and policy of the nutritional sciences? *GT Keusch*
- 523S Vernon R Young Family Foundation: hopes for the future. *R Young*
