

The American Journal of
CLINICAL NUTRITION

VOLUME 85 NUMBER 2 FEBRUARY 2007

Editorials

- 329 Homocysteine, B vitamins, and the risk of dementia. *R Clarke*
See corresponding article on page 511.
- 331 Postprandial lipoprotein metabolism—pivot or puzzle? *PL Zock*
See corresponding article on page 369.

Review Article

- 333 Micronutrients in HIV-positive persons receiving highly active antiretroviral therapy.
PK Drain, R Kupka, F Mugusi, and WW Fawzi

Commentary

- 346 Why do obese patients not lose more weight when treated with low-calorie diets? A mechanistic perspective. *SB Heymsfield, JB Harp, ML Reitman, JW Beetsch, DA Schoeller, N Erondy, and A Pietrobelli*

Original Research Communications

Obesity and eating disorders

- 355 Television watching increases motivated responding for food and energy intake in children. *JL Temple, AM Giacomelli, KM Kent, JN Roemmich, and LH Epstein*
- 362 Approximation of total visceral adipose tissue with a single magnetic resonance image. *EW Demerath, W Shen, M Lee, AC Choh, SA Czerwinski, RM Siervogel, and B Towne*

Lipids

- 369 Postprandial effect of n-3 polyunsaturated fatty acids on apolipoprotein B-containing lipoproteins and vascular reactivity in type 2 diabetes. *KF Hilpert, SG West, PM Kris-Etherton, KD Hecker, NM Simpson, and P Alaupovic*
See corresponding editorial on page 331.
- 377 Reduced physical activity increases intermuscular adipose tissue in healthy young adults. *TM Manini, BC Clark, MA Nalls, BH Goodpaster, LL Ploutz-Snyder, and TB Harris*

Cardiovascular disease risk

- 385 Dietary α -linolenic acid inhibits proinflammatory cytokine production by peripheral blood mononuclear cells in hypercholesterolemic subjects. *G Zhao, TD Etherton, KR Martin, PJ Gillies, SG West, and PM Kris-Etherton*
- 392 Caffeinated beverage intake and the risk of heart disease mortality in the elderly: a prospective analysis. *JA Greenberg, CC Dunbar, R Schnoll, R Kokolis, S Kokolis, and J Kassotis*

Nutritional status, dietary intake, and body composition

- 399 Serum visfatin concentrations are positively correlated with serum triacylglycerols and down-regulated by overfeeding in healthy young men. *G Sun, J Bishop, S Khalili, S Vasdev, V Gill, D Pace, D Fitzpatrick, E Randell, Y-G Xie, and H Zhang*
- 405 Effects of birth cohort and age on body composition in a sample of community-based elderly. *J Ding, SB Kritchevsky, AB Newman, DR Taaffe, BJ Nicklas, M Visser, JS Lee, M Nevitt, FA Tylavsky, SM Rubin, M Pahor, and TB Harris for the Health ABC Study*
- 411 Effect of different macronutrients in excess on gastric sensory and motor functions and appetite in normal-weight, overweight, and obese humans. *MI Park, M Camilleri, H O'Connor, L Oenning, D Burton, D Stephens, and AR Zinsmeister*
- 419 BMI compared with 3-dimensional body shape: the UK National Sizing Survey. *JCK Wells, P Treleaven, and TJ Cole*

Carbohydrate metabolism and diabetes

- 426 High-glycemic-index carbohydrate meals shorten sleep onset. *A Afaghi, H O'Connor, and CM Chow*

(continued)

Energy and protein metabolism

- 431 Supplementation of soy protein with branched-chain amino acids alters protein metabolism in healthy elderly and even more in patients with chronic obstructive pulmonary disease. *MPKJ Engelen, EPA Rutten, CLN De Castro, EFM Wouters, AMWJ Schols, and NEP Deutz*
- 440 Plasma concentrations of free triiodothyronine predict weight change in euthyroid persons. *E Ortega, N Pannacciulli, C Bogardus, and J Krakoff*
- 446 Response of albumin synthesis to oral nutrients in young and elderly subjects. *G Caso, J Feiner, I Mileva, LJ Bryan, P Kelly, K Autio, MC Gelato, and MA McNurlan*

Vitamins, minerals, and phytochemicals

- 452 Production of stable-isotope-labeled bovine heme and its use to measure heme-iron absorption in children. *P Etcheverry, GE Carstens, E Brown, KM Hawthorne, Z Chen, and IJ Griffin*
- 460 Lowering homocysteine with B vitamins has no effect on biomarkers of bone turnover in older persons: a 2-y randomized controlled trial. *TJ Green, JA McMahon, CM Skeaff, SM Williams, and SJ Whiting*
- 465 Bioavailability of food folates is 80% of that of folic acid. *RM Winkels, IA Brouwer, E Siebelink, MB Katan, and P Verhoef*

Pregnancy and lactation

- 474 Effect of the maternal β^E -globin gene on hematologic responses to iron supplementation during pregnancy. *K Sanchaisuriya, S Fucharoen, T Ratanasiri, P Sanchaisuriya, G Fucharoen, E Dietz, and FP Schelp*

Immunity

- 480 Long-term effects of perinatal nutrition on T lymphocyte kinetics in young Gambian men. *H Ghattas, DL Wallace, JA Solon, SM Henson, Y Zhang, PT Ngom, R Aspinall, G Morgan, GE Griffin, AM Prentice, and DC Macallan*

Cancer

- 488 Dietary synbiotics reduce cancer risk factors in polypectomized and colon cancer patients. *J Rafter, M Bennett, G Caderni, Y Clune, R Hughes, PC Karlsson, A Klinder, M O'Riordan, GC O'Sullivan, B Pool-Zobel, G Rechkemmer, M Roller, I Rowland, M Salvadori, H Thijs, J Van Loo, B Watzl, and JK Collins*
- 497 Vitamin A, retinol, and carotenoids and the risk of gastric cancer: a prospective cohort study. *SC Larsson, L Bergkvist, I Näslund, J Rutegård, and A Wolk*
- 504 Watercress supplementation in diet reduces lymphocyte DNA damage and alters blood antioxidant status in healthy adults. *CIR Gill, S Haldar, LA Boyd, R Bennett, J Whiteford, M Butler, JR Pearson, I Bradbury, and IR Rowland*

Nutritional epidemiology and public health

- 511 Homocysteine, B vitamins, and the incidence of dementia and cognitive impairment: results from the Sacramento Area Latino Study on Aging. *MN Haan, JW Miller, AE Aiello, RA Whitmer, WJ Jagust, DM Mungas, LH Allen, and R Green*
See corresponding editorial on page 329.
- 518 Heme and non-heme iron consumption and risk of gallstone disease in men. *C-J Tsai, MF Leitzmann, WC Willett, and EL Giovannucci*
- 523 Fruit and vegetable consumption, intake of micronutrients, and benign prostatic hyperplasia in US men. *S Rohrmann, E Giovannucci, WC Willett, and EA Platz*
- 530 Maternal diet during pregnancy in relation to eczema and allergic sensitization in the offspring at 2 y of age. *S Sausenthaler, S Koletzko, B Schaaf, I Lehmann, M Borte, O Herbarth, A von Berg, HE Wichmann, and J Heinrich for the LISA Study Group*
- 538 Comparison of the effects of zinc delivered in a fortified food or a liquid supplement on the growth, morbidity, and plasma zinc concentrations of young Peruvian children. *KH Brown, D López de Romaña, JE Arsenaault, JM Peerson, and ME Penny*
- 548 Reproducibility and validity of dietary glycemic index, dietary glycemic load, and total carbohydrate intake in 141 Swedish men. *EB Levitan, CW Westgren, S Liu, and A Wolk*

Gene-nutrient interactions

- 554 α -Linolenic acid, Δ^6 -desaturase gene polymorphism, and the risk of nonfatal myocardial infarction. *A Baylin, E Ruiz-Narvaez, P Kraft, and H Campos*

(continued)

Dietary supplements

561 Dietary sialic acid supplementation improves learning and memory in piglets. *B Wang, B Yu, M Karim, H Hu, Y Sun, P McGreevy, P Petocz, S Held, and J Brand-Miller*

570 **Erratum**

Book Review

571 *Phytoestrogens in Functional Foods*, edited by Fatih Yildiz, Reviewed by AM Duncan

Supplement: Maternal Nutrition and Optimal Infant Feeding Practices

577S Maternal nutrition and optimal infant feeding practices: executive summary. *DJ Raiten, SC Kalhan, and WW Hay Jr*

584S Low birth weight in the United States. *RL Goldenberg and JF Culhane*

591S Placental transport: a function of permeability and perfusion. *FC Battaglia*

598S In utero physiology: role of folic acid in nutrient delivery and fetal development. *AC Antony*

604S In utero physiology: role in nutrient delivery and fetal development for calcium, phosphorus, and vitamin D. *SA Abrams*

608S Can extrauterine growth approximate intrauterine growth? Should it? *PJJ Sauer*

614S Nutrition and the developing brain: nutrient priorities and measurement. *MK Georgieff*

621S Regulation of proteolysis and optimal protein accretion in extremely premature newborns. *SC Denne*

625S Evaluation of the evidence to support current recommendations to meet the needs of premature infants: the role of human milk. *RJ Schanler*

629S Gastrointestinal development and meeting the nutritional needs of premature infants. *J Neu*

635S Optimal duration of exclusive breastfeeding: what is the evidence to support current recommendations? *MS Fewtrell, JB Morgan, C Duggan, G Gunnlaugsson, PL Hibberd, A Lucas, and RE Kleinman*

639S Complementary feeding: clinically relevant factors affecting timing and composition. *NF Krebs and KM Hambidge*
