

The American Journal of CLINICAL NUTRITION

VOLUME 87 NUMBER 3 MARCH 2008

Editorial

- 515 Ruminant or industrial sources of *trans* fatty acids: public health issue or food label skirmish? *W Willett and D Mozaffarian*
See corresponding articles on pages 558 and 593.

Commentary

- 517 Is folic acid good for everyone? *AD Smith, Y-I Kim, and H Refsum*

Original Research Communications

Obesity and eating disorders

- 534 Early differences in fecal microbiota composition in children may predict overweight. *M Kalliomäki, MC Collado, S Salminen, and E Isolauri*

Lipids

- 539 Immune function and leukocyte sequestration under the influence of parenteral lipid emulsions in healthy humans: a placebo-controlled crossover study. *MW Versleijen, WJ Oyen, HM Roelofs, SE van Ernst-de Vries, PH Willems, JB Jansen, and GJ Wanten*
- 548 Essential n-3 fatty acids in pregnant women and early visual acuity maturation in term infants. *SM Innis and RW Friesen*

Cardiovascular disease risk

- 558 Do *trans* fatty acids from industrially produced sources and from natural sources have the same effect on cardiovascular disease risk factors in healthy subjects? Results of the *trans* Fatty Acids Collaboration (TRANSFACT) study. *J-M Chardigny, F Destailats, C Malpuech-Brugère, J Moulin, DE Bauman, AL Lock, DM Barbano, RP Mensink, J-B Bezelgues, P Chaumont, N Combe, I Cristiani, F Joffre, JB German, F Dionisi, Y Boirie, and J-L Sébédio*
See corresponding editorial on page 515.
- 567 Effects of weight loss from a very-low-carbohydrate diet on endothelial function and markers of cardiovascular disease risk in subjects with abdominal obesity. *JB Keogh, GD Brinkworth, M Noakes, DP Belobrajdic, JD Buckley, and PM Clifton*
- 577 Dietary and supplementary betaine: acute effects on plasma betaine and homocysteine concentrations under standard and postmethionine load conditions in healthy male subjects. *W Atkinson, J Elmslie, M Lever, ST Chambers, and PM George*
- 586 Associations between physical activity, body fat, and insulin resistance (homeostasis model assessment) in adolescents: the European Youth Heart Study. *NS Rizzo, JR Ruiz, L Oja, T Veidebaum, and M Sjöström*
- 593 Study of the effect of *trans* fatty acids from ruminants on blood lipids and other risk factors for cardiovascular disease. *A Motard-Bélanger, A Charest, G Grenier, P Paquin, Y Chouinard, S Lemieux, P Couture, and B Lamarche*
See corresponding editorial on page 515.

Nutritional status, dietary intake, and body composition

- 600 Visceral adipose tissue and the ratio of visceral to subcutaneous adipose tissue are greater in adults with than in those without spinal cord injury, despite matching waist circumferences. *LA Edwards, JM Bugaresti, and AC Buchholz*
- 608 Vitamin D insufficiency in southern Arizona. *ET Jacobs, DS Alberts, JA Foote, SB Green, BW Hollis, Z Yu, and ME Martínez*
- 614 The use of multiple logistic regression to identify risk factors associated with anemia and iron deficiency in a convenience sample of 12-36-mo-old children from low-income families. *JM Schneider, ML Fujii, CL Lamp, B Lönnerdal, KG Dewey, and S Zidenberg-Cherr*

(continued)

- 621 Weight-loss diet that includes consumption of medium-chain triacylglycerol oil leads to a greater rate of weight and fat mass loss than does olive oil. *M-P St-Onge and A Bosarge*

Carbohydrate metabolism and diabetes

- 627 Glycemic index, glycemic load, and chronic disease risk—a meta-analysis of observational studies. *AW Barclay, P Petocz, J McMillan-Price, VM Flood, T Prvan, P Mitchell, and JC Brand-Miller*
- 638 Effect of carbohydrate distribution on postprandial glucose peaks with the use of continuous glucose monitoring in type 2 diabetes. *KL Pearce, M Noakes, J Keogh, and PM Clifton*
- 645 Effect of cereal test breakfasts differing in glycemic index and content of indigestible carbohydrates on daylong glucose tolerance in healthy subjects. *AC Nilsson, EM Östman, Y Granfeldt, and IME Björck*
- 655 Glycemic index and glycemic load in relation to food and nutrient intake and metabolic risk factors in a Dutch population. *H Du, DL van der A, MME van Bakel, CJH van der Kallen, EE Blaak, MMJ van Greevenbroek, EHJM Jansen, G Nijpels, CDA Stehouwer, JM Dekker, and EJM Feskens*

Energy and protein metabolism

- 662 Alkaline diets favor lean tissue mass in older adults. *B Dawson-Hughes, SS Harris, and L Ceglia*
- 666 Increasing habitual protein intake results in reduced postprandial efficiency of peripheral, anabolic wheat protein nitrogen use in humans. *B Juillet, H Fouillet, C Bos, F Mariotti, N Gausserès, R Benamouzig, D Tomé, and C Gaudichon*

Vitamins, minerals, and phytochemicals

- 679 Demographic, anthropometric, and lifestyle factors and dietary intakes in relation to daidzein-metabolizing phenotypes among premenopausal women in the United States. *C Atkinson, KM Newton, EJ Aiello Bowles, M Yong, and JW Lampe*
- 688 Pharmacokinetics of a single, large dose of cholecalciferol. *M Ilahi, LAG Armas, and RP Heaney*

Growth, development, and pediatrics

- 692 Dynamic coordination of macronutrient balance during infant growth: insights from a mathematical model. *PN Jordan and KD Hall*
- 704 Effects of prenatal food and micronutrient supplementation on infant development: a randomized trial from the Maternal and Infant Nutrition Interventions, Matlab (MINIMat) study. *F Tofail, LÅ Persson, S El Arifeen, JD Hamadani, F Mehrin, D Ridout, E-C Ekström, SN Huda, and SM Grantham-McGregor*

Nutritional epidemiology and public health

- 712 Diet and risk factors for age-related maculopathy. *ED O'Connell, JM Nolan, J Stack, D Greenberg, J Kyle, L Maddock, and S Beatty*
- 723 Dose-response trial of prophylactic zinc supplements, with or without copper, in young Ecuadorian children at risk of zinc deficiency. *SE Wuehler, F Sempéregui, and KH Brown*
- 734 Plasma folate, vitamin B-6, vitamin B-12, and risk of breast cancer in women. *J Lin, I-M Lee, NR Cook, J Selhub, JE Manson, JE Buring, and SM Zhang*

Gene-nutrient interactions

- 744 Postprandial triacylglycerol metabolism is modified by the presence of genetic variation at the perilipin (*PLIN*) locus in 2 white populations. *P Perez-Martinez, N Yiannakouris, J Lopez-Miranda, D Arnett, M Tsai, E Galan, R Straka, J Delgado-Lista, M Province, J Ruano, I Borecki, J Hixson, B Garcia-Bailo, F Perez-Jimenez, and JM Ordovas*
- 753 Cruciferous vegetables, the *GSTP1 Ile¹⁰⁵Val* genetic polymorphism, and breast cancer risk. *S-A Lee, JH Fowke, W Lu, C Ye, Y Zheng, Q Cai, K Gu, Y-T Gao, X Shu, and W Zheng*

Bone metabolism

- 761 Long-term consumption of isoflavone-enriched foods does not affect bone mineral density, bone metabolism, or hormonal status in early postmenopausal women: a randomized, double-blind, placebo controlled study. *E Brink, V Coxam, S Robins, K Wahala, A Cassidy, and F Branca on behalf of the PHYTOS Investigators*
- 771 The skeletal benefits of calcium- and vitamin D₃-fortified milk are sustained in older men after withdrawal of supplementation: an 18-mo follow-up study. *RM Daly, N Petrass, S Bass, and CA Nowson*

(continued)

Dietary supplements

- 778 Green tea extract ingestion, fat oxidation, and glucose tolerance in healthy humans. *MC Venables, CJ Hulston, HR Cox, and AE Jeukendrup*
- 785 Prebiotic evaluation of a novel galactooligosaccharide mixture produced by the enzymatic activity of *Bifidobacterium bifidum* NCIMB 41171, in healthy humans: a randomized, double-blind, crossover, placebo-controlled intervention study. *F Depeint, G Tzortzis, J Vulevic, K l'Anson, and GR Gibson*

Letters to the Editor

- 792 Artifact in the control group undermines the conclusions of a vitamin D and cancer study. *R Schabas*
- 792 Calcium supplementation and cancer incidence. *MJ Bolland and IR Reid*
- 793 Reply to R Schabas and to MJ Bolland and IR Reid. *RP Heaney, JM Lappe, and K Michael Davies*
- 794 **Erratum**

Book Review

- 795 *Mindless Eating: Why We Eat More Than We Think*, by Brian Wansink. *Reviewed by T Baranowski*
