

# The American Journal of CLINICAL NUTRITION

VOLUME 90 NUMBER 1 JULY 2009

## Perspective

- 1 Food sources of nitrates and nitrites: the physiologic context for potential health benefits. *NG Hord, Y Tang, and NS Bryan*  
**See corresponding editorial on page 11.**

## Editorials

- 11 Nitrate in foods: harmful or healthy? *MB Katan*  
**See corresponding article on page 1.**
- 13 Adherence to dietary guidelines: benefits on atherosclerosis progression. *PM Kris-Etherton*  
**See corresponding article on page 193.**

## Original Research Communications

### Obesity and eating disorders

- 15 Vitamin status after bariatric surgery: a randomized study of gastric bypass and duodenal switch. *ET Aasheim, S Björkman, TT Søvik, M Engström, SE Hanvold, T Mala, T Olbers, and T Böhmer*
- 23 Long-term effects of a very-low-carbohydrate weight loss diet compared with an isocaloric low-fat diet after 12 mo. *GD Brinkworth, M Noakes, JD Buckley, JB Keogh, and PM Clifton*
- 33 Dieting, restraint, and disinhibition predict women's weight change over 6 y. *JS Savage, L Hoffman, and LL Birch*

### Lipids

- 41 Differential effects of protein quality on postprandial lipemia in response to a fat-rich meal in type 2 diabetes: comparison of whey, casein, gluten, and cod protein. *LS Mortensen, ML Hartvigsen, LJ Brader, A Astrup, J Schrezenmeir, JJ Holst, C Thomsen, and K Hermansen*
- 49 Association of serum n-6 and n-3 polyunsaturated fatty acids with lipids in 3 populations of middle-aged men. *KR Motoyama, JD Curb, T Kadowaki, A El-Saed, RD Abbott, T Okamura, RW Evans, Y Nakamura, K Sutton-Tyrrell, BL Rodriguez, A Kadota, D Edmundowicz, BJ Willcox, J Choo, N Katsumi, T Otake, S Kadowaki, LH Kuller, H Ueshima, and A Sekikawa*

### Cardiovascular disease risk

- 56 Effects of walnut consumption on blood lipids and other cardiovascular risk factors: a meta-analysis and systematic review. *DK Banel and FB Hu*

### Nutritional status, dietary intake, and body composition

- 64 Adiposity and insulin resistance in nondiabetic hemodialysis patients: effects of high energy supplementation. *S-C Hung and D-C Tarnag*
- 70 Skim milk compared with a fruit drink acutely reduces appetite and energy intake in overweight men and women. *ER Dove, JM Hodgson, IB Puddey, LJ Beilin, YP Lee, and TA Mori*
- 76 Iron status of breastfed infants is improved equally by medicinal iron and iron-fortified cereal. *EE Ziegler, SE Nelson, and JM Jeter*

### Carbohydrate metabolism and diabetes

- 88 Dairy and industrial sources of *trans* fat do not impair peripheral insulin sensitivity in overweight women. *A-L Tardy, S Lambert-Porcheron, C Malpuech-Brugère, C Giraudet, J-P Rigaudière, B Laillet, P LeRuyet, J-L Peyraud, Y Boirie, M Laville, M-C Michalski, J-M Chardigny, and B Morio*

(continued)

## Energy and protein metabolism

- 95 Enteral administration of alanyl-[2-<sup>15</sup>N]glutamine contributes more to the de novo synthesis of arginine than does intravenous infusion of the dipeptide in humans. *GC Lighthart-Melis, MCG van de Poll, MAR Vermeulen, PG Boelens, MP van den Tol, C van Schaik, J-P De Bandt, NEP Deutz, CHC Dejong, and PAM van Leeuwen*
- 106 Ingestion of a protein hydrolysate is accompanied by an accelerated in vivo digestion and absorption rate when compared with its intact protein. *R Koopman, N Crombach, AP Gijzen, S Walrand, J Fauquant, AK Kies, S Lemosquet, WHM Saris, Y Boirie, and LJC van Loon*

## Vitamins, minerals, and phytochemicals

- 116 Folate is absorbed across the colon of adults: evidence from cecal infusion of <sup>13</sup>C-labeled [6S]-5-formyltetrahydrofolic acid. *S Aufreiter, JF Gregory III, CM Pfeiffer, Z Fazili, Y-I Kim, N Marcon, P Kamalapor, PB Pencharz, and DL O'Connor*
- 124 Randomized, double-blind, placebo-controlled trial of iron supplementation in female soldiers during military training: effects on iron status, physical performance, and mood. *JP McClung, JP Karl, SJ Cable, KW Williams, BC Nindl, AJ Young, and HR Lieberman*
- 132 Antenatal supplementation with folic acid + iron + zinc improves linear growth and reduces peripheral adiposity in school-age children in rural Nepal. *CP Stewart, P Christian, SC LeClerq, KP West Jr, and SK Khatry*

## Pregnancy and lactation

- 141 Micronutrient supplementation affects maternal-infant feeding interactions and maternal distress in Bangladesh. *AL Frith, RT Naved, E-C Ekström, KM Rasmussen, and EA Frongillo*
- 149 Fish and long-chain n-3 polyunsaturated fatty acid intakes during pregnancy and risk of postpartum depression: a prospective study based on a large national birth cohort. *M Ström, EL Mortensen, TI Halldorson, I Thorsdottir, and SF Olsen*

## Growth, development, and pediatrics

- 156 Insulin-like growth factor I concentrations in infancy predict differential gains in body length and adiposity: the Cambridge Baby Growth Study. *KK Ong, M Langkamp, MB Ranke, K Whitehead, IA Hughes, CL Acerini, and DB Dunger*

## Cancer

- 162 Longitudinal study of serum carotenoid, retinol, and tocopherol concentrations in relation to breast cancer risk among postmenopausal women. *GC Kabat, M Kim, LL Adams-Campbell, BJ Caan, RT Chlebowski, ML Neuhouser, JM Shikany, and TE Rohan*

## Aging

- 170 Dietary intake of fish and omega-3 fatty acids in relation to long-term dementia risk. *EE Devore, F Grodstein, FJA van Rooij, A Hofman, B Rosner, MJ Stampfer, JCM Witteman, and MMB Breteler*
- 177 Dietary screening tool identifies nutritional risk in older adults. *RL Bailey, PE Miller, DC Mitchell, TJ Hartman, FR Lawrence, CT Sempos, and H Smiciklas-Wright*
- 184 Omega-3 fatty acids and risk of dementia: the Canadian Study of Health and Aging. *E Kröger, R Verreault, P-H Carmichael, J Lindsay, P Julien, E Dewailly, P Ayotte, and D Laurin*

## Nutritional epidemiology and public health

- 193 Adherence to 2005 *Dietary Guidelines for Americans* is associated with a reduced progression of coronary artery atherosclerosis in women with established coronary artery disease. *F Imamura, PF Jacques, DM Herrington, GE Dallal, and AH Lichtenstein*  
**See corresponding editorial on page 13.**
- 202 Fruit and vegetable intakes and subsequent changes in body weight in European populations: results from the project on Diet, Obesity, and Genes (DiOGenes). *B Buijsse, EJM Feskens, MB Schulze, NG Forouhi, NJ Wareham, S Sharp, D Palli, G Tognon, J Halkjaer, A Tjønneland, MU Jakobsen, K Overvad, DL van der A, H Du, TIA Sørensen, and H Boeing*
- 210 Relation of body mass index and skinfold thicknesses to cardiovascular disease risk factors in children: the Bogalusa Heart Study. *DS Freedman, PT Katzmarzyk, WH Dietz, SR Srinivasan, and GS Berenson*
- 217 Assessment of the relative dose-response test based on serum retinol-binding protein instead of serum retinol in determining low hepatic vitamin A stores. *M Fujita, E Brindle, A Rocha, B Shell-Duncan, P Ndemwa, and KA O'Connor*

(continued)

### **Gene-nutrient interactions**

- 225 Mortality in HIV infection is independently predicted by host iron status and *SLC11A1* and *HP* genotypes, with new evidence of a gene-nutrient interaction. *JM McDermid, MFS van der Loeff, A Jaye, BJ Hennig, C Bates, J Todd, G Sirugo, AV Hill, HC Whittle, and AM Prentice*

### **Bone metabolism**

- 234 Soy proteins and isoflavones affect bone mineral density in older women: a randomized controlled trial. *AM Kenny, KM Mangano, RH Abourizk, RS Bruno, DE Anamani, A Kleppinger, SJ Walsh, KM Prestwood, and JE Kerstetter*

### **Letters to the Editor**

- 243 Glycemic index in overweight development: distinguishing limited evidence from limits in evidence. *AE Buyken, ALB Günther, A Barclay, J Brand-Miller, and MB Schulze*
- 244 Reply to AE Buyken et al. *MA Mendez and H Schröder*
- 246 Fortification of salt with iodine and iron in India. *SLR Shankar, AC Mathew, M Sivamani, MS Banu, and AA Idupuganti*
- 246 Reply to SLR Shankar et al. *M Andersson. RF Hurrell, MB Zimmermann, P Thankachan, S Muthayya, AV Kurpad, and RB Goud*

### **248 Errata**

### **249 Calendar of Events**
